

We're looking for Interns!

What is an Elemental Internship?

Elemental's summer internship program offers paid work opportunities for college students and recent graduates interested in climate tech. This is a 10-week, full-time (40 hours per week) internship with one of the mission-driven startups in Elemental's portfolio. The available positions vary from marketing, business, technology, science, engineering, and beyond.

A summer internship with an Elemental company is much more than a paying job and an opportunity to gain valuable work experience. It's about finding joy in your work, and facing barriers and overcoming frustrations to unlock personal growth. During these 10 weeks interns will become fully immersed in the teams, work, and culture of the host company. We encourage interns to invest in themselves and grow their personal and professional skills. Elemental will offer 2-3 hours a week of networking opportunities tailored to the startup environment for climate tech.

We are looking for young talent from all backgrounds to be a part of our 2021 intern cohort, so we hope you'll [apply](#).
